# insights
# people with st segment 3 is very low compare to the other two
# thallium stress test was normal for more people and people with thallium stress test fixed_defect was very low
# resting blood pressure was in the range of 135-140 for more people
# most of the patient have chest pain type four
# almost half of the patient has num_major_vessels colored by flourosopy of 0
# people with fasting blood sugar lesser than 120 is high
# very few peoples resting electrocardiographic results was normal
# more people has serum cholestoral in the range of 198-270, serum cholestoral has outlayers
# measure of abnormality in electrocardiograms was at 0 this proves that most of the peoples were normal, has outlayers
# many of the peoples in this dataset was male
# people in the age group of 53-68 was high
# maximum heart beat per minute was in the range of 142-179 for many
# more people does not have exercise_induced_angina
# people without heart disease is more compare to the people with heart disease
